New Horizons Women's Care is designed to provide personalized, comprehensive obstetrical and gynecological care to women of all ages. The practice is located in Phoenix's rapidly growing Southeast Valley. Although the population is expanding, personalized care is a high priority. Our providers involve patients in the plan of care. New Horizons Women's Care provides a full range of services including annual well-woman exams, family planning, infertility treatment, contraceptive education and prescribing, menopausal education and treatment, full obstetric care as well as access to clinical research protocols that may benefit all women in the future. Although keeping patients healthy is the goal, treating problems such as endometriosis, abnormal Pap smears, infections and hormonal imbalances are also a part of what we provide. Our providers are skilled surgeons and are able to perform a broad range of surgical procedures including numerous advanced laparoscopic procedures, bladder suspension, and hysterectomy
